to the sluggish downstream demand, raw material price fluctuation, increased supply and other factors. According to the data of the Ministry of Industry and Information Technology, from January to December 2023, revenue of papermaking and paper product enterprises above designated size was RMB1,392.62 billion, down 2.4% year on year; their operating costs were RMB1,222.80 billion, down 3.1% year on year; and their total profit was RMB50.84 billion, up 4.4% year on year.

On the supply side, the domestic and overseas supply growth had a great effect on paper price fluctuation. Domestically, new paper production capacity in China had been drastically high in the past two years. Overseas, the import volume of machine-made paper and paperboard increased year on year as a result of the “zero tariff” policy. The domestic and overseas factors boosted the machine-made paper supply. According to the data of the National Bureau of Statistics, the national output of machine-made paper and paperboard was 144,055,300 tonnes from January to December, 2023, which exceeded the 140 million tonnes mark for the first time and reached a record high. During the reporting period, the prices of cultural paper and white cardboard prices were mixed. In terms of price, the white cardboard price rebounded slightly in October and November, and showed an overall fluctuating downward trend. The cultural paper price had a “V”-shaped trend that fluctuated downward in the first half of the year and floated upward in the second half.

In terms of cost, the paper raw material prices and energy prices had fluctuated downward since 2023. However, due to a higher price base and the cost transmission delay, the paper enterprise production cost was still at a high level in 2023. Coupled with the weak product demand, enterprises faced a greater pressure to realise profit.

In the short term, the paper product prices still face some upside resistance under the sufficient supply. However, the fierce competition will prompt leading enterprises to exploit the scale and cost advantages, and will facilitate the liquidation of small and medium-sized enterprises to improve the industry operational efficiency, thus further enhancing the industry concentration. In the long run, China’s paper industry concentration is still at a low level. The data shows that the CR10 in China’s paper industry remained at about 45% in 2022, compared with about 50% for

technologies. The Company also works hard on the following aspects: carrying out academic research with colleges and universities and R&D institutions such as Qilu University of Technology, Qingdao University of Science and Technology, Tianjin University of Science and Technology, and Institute of Chemical Industry of Forest Products of the Chinese Academy of Forestry, introducing, digesting and absorbing scientific research and innovation achievements, accelerating the industrialisation of new and high technologies, optimising product mix, and improving the competitiveness of its products in the market.

(4) Analysis of Core Competitiveness

After innovation and development for more than 60 years, the Company has created a strong brand influence and cultivated a solid comprehensive competitiveness. It promotes product upgrades, enhances R&D strength and improves core competitiveness by creating competitive advantages in industry chain featured with pulp and paper integration. The core competitiveness of the Company did not undergo major changes during the reporting period. The details of the core competitiveness of the Company are as follows:

① Advantages of pulp and paper integration

The Company has unwaveringly implemented a pulp and paper integration strategy. At present, its major production bases located in Shouguang, Zhanjiang, and Huanggang are equipped with chemical pulp production lines, with total production capacity of wood pulp reaching 4.30 million tonnes. It is the first modern large-scale paper making company that basically realises wood pulp self-sufficiency in China. A complete supply chain not only creates cost advantage for the Company, but also safeguards the safety, stability and quality of upstream raw materials, and renders strong support for the Company to maintain its long-term competitiveness.

② Scale advantages

The paper making industry is a typical capital-intensive and technology-intensive industry that follows the laws of economies of scale. The Company is a leading player in the paper making industry in China. Its large-scale production bases can be found in the major markets in Southern, Central, Northern, and Northeast China, with annual pulp and paper production capacity reaching 11 million tonnes, where reasonable production scale creates the marginal cost advantage. Meanwhile, by leveraging the scale advantages, the Company has built an international logistics centre and railway dedicated lines and docks, and constructed a comprehensive logistics service platform covering container shipping, bonded warehousing, transfer and storage at stations and terminals, realising the improvement of logistics efficiency and the stability of logistics costs.

③ Product advantages

The Company is an enterprise that offers the widest and the most complete product range in the paper making industry in China. The product series include culture paper, white cardboard, coated paper, copy paper, household paper, thermal paper, etc., with each major product ranking among the best in terms of market share. The Company has attached great importance to technology research and development. By introducing the most advanced pulping and paper making technology and equipment in the world, it persists in technological innovation and work process optimisation, so as to help improve product quality and structure upgrade, continuously improve the brand value of Chenming, and enhance brand benefits.

④ Industry layout advantages

Closely centring on the pulp and paper integration strategy, the Company has integrated resources and established its production bases in the core target market to promote the coordinated development of all regions. Currently, the Company adopts the market-oriented approach and has production bases in Shandong, Guangdong, Hubei, Jiangxi, Jilin and other places. With all products sold at close distances, the Company substantially reduces transportation costs while improving service efficiency, achieving a “win-win” between the Company and its users.

⑤ Advantages in technical equipment

The Company highly values the introduction and upgrades of technical equipment, actively push equipment and technology upgrade forward and boasts the largest and most advanced pulping and paper making production line in the world. The Company’s major production equipment has been imported from internationally renowned manufacturers, including Metso and Valmet of Finland, Voith of Germany, Andritz of Austria, etc. and reached the advanced international level, thus ensuring production efficiency and product quality.

⑥ Advantages in research and innovation

The Company has scientific research institutions including a national enterprise technology centre, a post-doctoral working station, and a collaborative innovation center for cleaner production and refinery of light industry bio-based products. At the same time, the Company actively carries out in-depth industry-university-research cooperation with prestigious domestic universities and research institutes, continuously improves technical innovation capabilities and scientific research and development levels, and develops a series of new products with high technology contents and high added value as well as proprietary technologies. The Company and its subsidiaries Zhanjiang Chenming, Shouguang Meilun, Jiangxi Chenming, Jilin Chenming and Huanggang Chenming are high and new technology enterprises. As at the end of the reporting period, the Company had obtained over 400 national patents, including 41 invention patents, 7 national new products, 16 scientific and technological progress awards above the provincial level, 5 national scientific and technological projects and 75 provincial technological innovation projects. The Company took the lead in obtaining the ISO9001 quality system certification, the ISO14001 environmental protection system certification and the FSC-COC international forest system certification among domestic peers.

⑦ Team management advantages

The Company possesses a complete and reasonable talent structure consisting of experienced personnel, including high-end talents specialising in production, technology, sales, finance, laws, etc. In the course of business operations, the stable core team has developed a corporate culture that ties in with the Company’s development, summarised management experience with industry characteristics, and formed a team advantage integrating management and culture, allowing it to accurately grasp the industry development trend. At the same time, the Company has paid attention to the construction of a talent reserve and cultivation mechanism. With advanced business concepts and enormous development space, the Company has attracted an array of high-calibre professionals and improved the level of human capital construction, providing solid guarantee for the Company’s long-term sustainable development.

⑧ Advantages in environmental governance capacity

The Company has actively upheld the concept of “lucid waters and lush mountains are invaluable assets”, adhered to the development idea of “placing green development and environmental protection as its priority”, always regarded environmental protection as the “life project”, clung to the green development model of clean production and resource recycling, and earnestly shouldered the corporate responsibility for environmental protection. In recent years, the Company and its subsidiaries have invested more than RMB8 billion in total in environmental protection, and have constructed the pollution treatment facilities including the alkali recovery system, reclaimed water treatment system, reclaimed water reuse system, white water recovery system and black liquor comprehensive utilisation system. The environmental protection indicators rank high in China and in the world. At present, the Company adopts the world’s most advanced “ultrafiltration membrane + reverse osmosis membrane” technology to complete the reclaimed water recycling membrane treatment project, which is the largest reclaimed water reuse project in the domestic paper industry. The reclaimed water recycle rate attains the industry-leading level. The reclaimed water quality meets drinking water standards, which can save hundreds of thousands cubic metres of fresh water every day. Meanwhile, in response to the “dual carbon” policy, the Company actively introduces photovoltaic power generation and biomass power generation, continuously optimises the energy structure and improves the level of low-carbon production.
